

Report on the needs Analysis

Analysis of the training and educational needs of Italian teachers of Mathematics and Science provided through the questionnaires

Maria Teresa Giraudo – Marina Marchisio

Sent to all partners

Questions? Comments? Suggestions?

Sent us as soon as possible. Thanks!

Reports

- 1) Identification of pedagogical and disciplinary topics
- 2) The standard competences

Alberto Conte – Chiara Mancinelli

Sent to the coordinator

Volume on Educational Needs

- It could be presented during multiplier events of the Project.
- The volume could be published by Accademia delle Scienze of Turin.
- It could be an output who gives visibility to the Project.
- It would be nice that the volume contains a short explanation of the high school system for each country.
- A contribution of Confindustria but of course it is welcome.
- We have to fix a deadline for the preparation of the contributions.

Index

0. Introduction (Coordinator Pardini)
