OOO Mathematical Modelling

Teacher training

University of Turin took care about it

June 2015

Prof. M. Marchisio

Tutor: A. Barana, M. Sacchet, M. Fioravera

Teachers of Math and Science from Germany, Greece

Topics: Moodle, Maple, Maple TA

Number of sessions of 1 hour: 4

Recorded and available on the Moodle platform of the Project together the materials

Maple licences sent to all teachers and for laboratories

Questions and Solutions

Comments?

Feedbacks?

Difficulties?

Needs?

Did the teachers try to use Maple in August?

Are we going to send the licences also for students?

Tutoring in September

In september a tutoring service will be activated (via forum and via web)

Teachers that couldn't attend the training course are invited to listen and read the videos and the materials put on the platform

Teachers are supposed to use the materials with students as soon as possible in class and on the platform

Classes of students on the platform

Each teacher will receive an excel file and the instructions
in order to credit the students on the platform

Each teacher can credit until 5 classes

Materials requested and prepared

Materials requested were prepared (see together on the platform)

We have to decide if the materials are put in the courses of the teachers

Teachers have to send us as soon as possible other requests of material

OOO Mathematical Modelling

- Format of the OOC (see together on the platform)
- A collection of problems in the four topics fixed is in preparation
- Each problem has a test in MapleTA
- Modules about problem solving must be prepared (Miur)
- Tests with MapleTA must be thought (Chalmers)
